

Corporate overview

High quality satcoms products and systems by design, delivered by professionals.

SATCOMS PRODUCTS AND SYSTEMS

Professionals delivering cost-effective high quality satcoms systems...

Bespoke solution design - We apply best practice combined with extensive experience to design satellite communications systems to meet your specific technical, operational and business needs at an attractive price.

High quality products - Our products are highly reliable and versatile by design. Whether installed directly, or by other satcoms systems integrators, you can have confidence in their reliability, performance and ease of use.

Professional systems delivery - We focus on the quality of our service to you, to deliver products and systems that meet your technical, operational and business needs, with the right functionality and integration.

WITH 20 YEARS OF SATCOMS EXPERIENCE

20 years of global satcoms design and delivery experience...

Our heritage— A UK company, S3 Satcom was founded by 6 individuals, each with over 20 years of satcoms experience, to provide quality professional services for the design and delivery of highly reliable solutions at a sensible price.

Our references— S3 Satcom has delivered solutions all over the world— including Western Europe (UK, Italy, Spain, Norway...), Eastern Europe (Romania, Bosnia...), Middle East (Dubai, Egypt, Qatar...), Africa, Asia and other regions.

Our commitment— S3 Satcom are committed to continuing our high quality approach, whether delivering services directly, or through our reseller network. We listen to your needs and design innovative and reliable systems.

DELIVERING BUSINESS BENEFITS TO YOU

Higher levels of systems reliability and performance, with reduced risk...

Lower risk projects - By employing our services for turn-key solution delivery, or integrating one of our products into your system, you reduce the risk on your satcoms project. Let our high quality approach bring you peace of mind.

Easier to use systems - We pride ourselves on delivering products and solutions whose monitor and control integration and interfaces offer more than the rest, ensuring that your operators can do their jobs efficiently and accurately.

Superior performance—As our customers will testify, our products have features, accuracy and performance above those of our competitors. And where we use third party products, we select the best fit to meet your needs.

High quality turn-key solutions

Best of breed systems design

Systems designed with the right components to meet your specific satcoms need.

Superior performance and reliability

Precision engineering, redundant systems and high quality components for optimum reliability.

Delivered by professionals you can trust

A highly skilled team, each with more than 20 years experience of satcoms solutions delivery.

Versatile, reliable products

Satsio small antenna tracking and pointing

The best small antenna tracking system on the market, offering unrivalled capabilities.

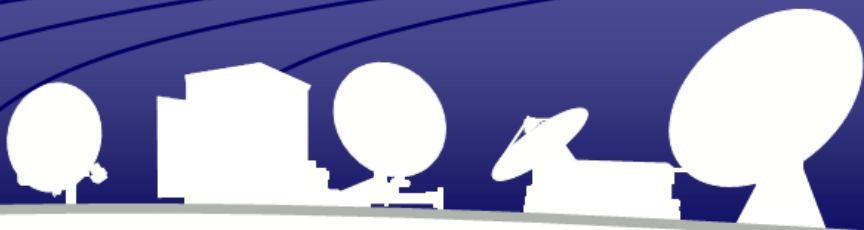

Fiesta user-friendly monitor & control

Flexible and intuitive user interface to a comprehensive satcoms M&C solution.

VSAT networks and Earth Stations

State-of-the-art solutions for private national and international data and voice networks.

S3 SATCOM SOLUTION FAMILY OVERVIEW

S3 Satcom systems and products are professionally designed by a team of experts, each with over 20 years experience in the satellite communications solutions business. Whether you need a full turn-key earth station, or to purchase a Satsio small antenna tracking system to install yourself, we focus on delivering quality—quality in the services we provide to you, and quality on terms of meeting your specific technical, operational and business needs.

FIXED EARTH STATIONS

Complete turn-key solution delivery of high quality earth stations...

Best of breed approach — We design earth stations that balance your required functionality and performance with your budget and delivery timescales. By integrating the best fit products from the market we deliver the best fit solution for your business.

Reliable and high performance— We understand that you'll only get the return on your earth station investment if it is highly reliable and high enough performance. We therefore design in the redundancy and capability into the system to meet this demand.

Superior monitor and control— With the S3 Satcom Fiesta monitor and control system integrated into your system your operators will have an easy-to-use, intuitive interface to their earth station(s), ensuring reliable and accurate use of your investment.

VSAT NETWORKS

High quality private communications networks...

3 to 20 site networks— With over 20 years experience in the design and delivery of bespoke national and international VSAT networks, we have a solution for you whether you are a broadcaster, government agency, bank, retail chain, oil industry...

Cost-effective operation—We help you minimise life time cost of your private network by analysing your traffic requirement and then balancing the VSAT hardware cost against the satellite bandwidth cost for the most cost-effective solution..

Right technology fit —Our VSAT systems operate using frame relay and include SCPC, MCPC and DAMA with time division multiplex technology. We ensure that the technology we apply provides the best performance for your specific network needs.

SATSIO TRACKING & POINTING

Simply the best small antenna tracking and pointing system on the market...

1.2 to 2.4m antenna— The Satsio small antenna tracking and pointing system consists of a robust mount and a controller, with a user-friendly web interface. Operators can easily select a target satellite, and Satsio will use NORAD tracking to accurately point and track it.

Delivering business benefits— Satsio provides cost-effective access inclined orbit satellite space segment, which themselves can be up to 70% lower cost. Satsio also replaces farms of small antenna with one that can quickly point at selected satellites.

Technically superior — With more accurate sensing and alignment, optimal pointing and auto polarisation, a web client and easy integration to monitor and control the complete earth station, Satsio is simply the most capable tracking system on the market.

ABOUT S3 SATCOM

S3 Satcom provides broadcasters, telcos and corporations with specialist satellite communications products and services.

Our products and systems include fixed earth stations, VSAT networks, M&C software and the market-leading Satsio small antenna tracking and pointing system.

S3 Satcom headquarters is in the United Kingdom. The company operates globally through a network of value added resellers.
